***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claim 1: on Line 19, after the word "pixels " delete "and bit positions for" and insert the following: --- wherein for each of the L ---.

Claim 1, on Line 20, after word "group." insert the following: --- L upper bits, one for each of the L pixels, are stored contiguously in the first sub-group and L lower bits, one for each of the L pixels, are stored contiguously in the second sub-group adjacent to the first sub-group ---.

Claim 8: on Line 15, after the word "group," insert the following: --- the display data being further organized such that, for each of L pixels in a particular group, L upper bits, one for each of the L pixels, are stored contiguously in the first sub-group and L lower bits, one for each of the L pixels, are stored contiguously in the second sub-group adjacent to the first sub-group ---.

Claims 12-13 canceled.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Michael T. Gabrik on 12.15.05.

***Allowable Subject Matter***

2. Claims 1-11 are allowed.

3. The following is an examiner's statement of reasons for allowance:

None of the cited references teaches or suggests a driving method of a display device that includes: simultaneously reading from a single display data RAM N-bit display data for each of the plurality of segment electrodes, the single display data RAM having an address space in which the display data is organized according to the groups of pixels defined by the commonly selected electrodes and respective segment electrodes and bit positions for pixels in the particular group, the display data being further organized such that, for each of L pixels in a particular group, L upper bits, one for each of the L pixels, are stored contiguously in the first sub-group and L lower bits, one for each of the L pixels, are stored contiguously in the second sub-group adjacent to the first sub-group as disclosed in claims 1 and 8. The closest art (Shingo and Furukawa) disclose related drivers, either singularly or in combination fail to anticipate suggest these limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
